Interview Notes:

██████████ completed two forensic interview sessions during which she detailed sexually inappropriate encounters with Officer Jamel Bradley, whom she referred to as "Bradley" during the second interview. During the first interview, she would not name him, but specified it was the SRO with the office on the second floor, making it clear as well that she did not have a close relationship with the other officer, whose name is Bunton. ██████████ relayed information about two specific days, March 12 and March 14, 2018, during which he kissed and touched her in his office with the door closed. ██████████ detailed how on "Day 1" (as she termed it), he kissed and touched her bare breasts and midsection, first while she was seated in a rolling chair, then by laying her back on a table, and then pressed his groin into her backside with her bent forward over a desk (with clothing on). "Day 2" was the day of the 17-minute walk out in honor of the Florida high school shooting victims. On that day, ██████████ alleged that Officer Bradley allowed her to miss the walk-out and remain in his office with the door closed. He returned to the office and attempted to kiss her on the lips, which she indicated was crossing a personal line. ██████████ described two other instances in which he patted and squeezed her buttocks, one time in a stair well as they were walking up to his office. ██████████ also disclosed in the second interview about a time that shocked her because he swept his hand from her vaginal area up the front of her body as she passed him in the hallway and other school personnel as well as students were around.

I asked ██████████ some questions about ██████████. Although she had stated to law enforcement responders that ██████████ her descriptions do not raise concerns about ██████████. Rather, she describes ██████████ and she attributes them more to ██████████ she did not want to disclose to me, involving ██████████ Her ██████████ difficulties with sleep.

DVD copies of both interviews provided to RCSD.
